A record number of individuals engaged in mixed and onward movements are consistently being reported as arriving in the Darien region. During the second quarter of 2023, 108,981 arrivals have been officially registered. This marks an increase of 20% compared to the first quarter.

In the first half of 2023, close to 200,000 arrivals have been documented in the Darien, with 40,000 arrivals in April alone. This escalation represents a staggering 634% increase compared to the corresponding period in 2022. The Panamanian authorities have estimated that 400,000 refugees and migrants are expected to cross by the end of the year. The main nationalities crossing the Darien remain the Bolivarian Republic of Venezuela, Haiti, and Ecuador. There is a noticeable increase in the arrival of extracontinental nationalities, including by Chinese, Afghan and Nepali nationals.

The number of people on the move reported missing in Central and North America (332) in 2023 remains a clear sign of the level of risks and hardship faced by people engaged in mixed movements across the region.

For additional information and analysis on mixed movements in the region covering April to June 2023, please see the [quarterly R4V Movements Report](#).

Mixed Movements

Overview of key figures and trends

According to official figures, more than 135,000 people entered Honduras irregularly during the first half of 2023. Venezuela (38%), Ecuador (14%), Haiti (13%), Cuba (8%), and China (3%) are the main nationalities.

As observed through various data collection efforts, most people's intention is to reach the United States. At the same time, in Mexico, over 74,000 new asylum claims were registered in the first half of 2023, a 28% increase when compared to the same period in 2022. The primary nationalities of asylum seekers in Mexico this year include Haiti (40%), Honduras (24%), Cuba (7%), and Venezuela (5%). It is relevant to mention, however, that the fact the individuals apply for asylum in Mexico does not necessarily mean they all intend to remain in Mexico in the medium or longer term.

By June 2023, more than 1.07 million encounters were reported at the U.S. Southwest land border, a 13% decrease compared to the same period in 2022. The primary nationalities include Mexico (36%), Venezuela (10%), Honduras (8%), Guatemala (8%), Colombia (7%), and Ecuador (4%). The decrease may be partly attributable to the new measures implemented as of 12 May by U.S. authorities for individuals who cross unlawfully the Southwestern border including expedited removal, a 5-year bar from reentry and a presumption of ineligibility for asylum, absent an applicable exception. At the same time the U.S. government announced a significant expansion of refugee resettlement and other lawful pathways including a humanitarian parole program for nationals of Cuba, Haiti, Nicaragua, and Venezuela. In June 2023, the Safe Mobility Offices (SMO) initiative was launched in Colombia, Costa Rica and Guatemala by the U.S. Government with the support of UNHCR and IOM to expand access to refugee resettlement and other lawful pathways of admission to the U.S. Additional information on the program is available [here](#).

Providing essential information to persons engaged in mixed movements on the availability of essential services, including safe shelter spaces along the migration route, access to national asylum processes, eligibility for resettlement and other pathways, including the U.S Parole Program, and the CBP One App, is an ongoing priority. Without accurate information, individuals remain vulnerable to deception, are more likely to accept offers from smugglers and to be subject to extortion, fraud, robbery, and abuse.

Ayaluz and her husband left Venezuela after selling everything they owned, and crossed the Darien jungle in search of a better life.

Their perilous journey lasted 8 days and left Ayaluz with severe dehydration, physical injuries, and emotional distress after witnessing the death of a family group. Injured and out of resources, the couple hopes to reach their destination safely.

Missing migrants in the Americas

- Since IOM began monitoring deaths and disappearances of migrants and people on the move, between 2014 until 30 June 2023, 7,867 cases have been recorded in the region. Actual figures may be a lot higher as not all deaths are recorded ([MMP, 2023](#)).
- During the first half of 2023, 495 cases were registered in the Americas. The break-down by sub-region is: Caribbean: 120; Central America: 222; South America: 43 and North America: 110 ([Idem](#)).

- Since the last part of 2022 an important increase in Ecuadorian outflows has been observed either through official exits or irregularly.
- Ecuadorian irregular movements could be observed through indirect sources such as registers of deportees received by the Ecuadorian Government from different countries and reported events by migration authorities from Panama, Mexico and the United States.
- Considering deportees received by Ecuadorian authorities, it is noticed an increasing trend from November 2022 to March 2023, with a peak of 3,377 deportees received.
- Apprehensions by United States authorities increased drastically between September and December 2022; as well as a similar trend during the same period reported by the Mexican immigration authority.

Mixed Movements Colombia

Necoclí, a small town situated in the department of Antioquia on the Caribbean coast of Colombia, has garnered attention since 2021 due to the significant influx of thousands of people who initiate their journey there, setting sail towards the shores of Panama. Subsequently, these individuals undertake an arduous journey by foot through the jungle in the Darien Province.

The subsequent line chart illustrates the weekly flow of individuals from various nationalities departing from Necoclí to Panama during the second quarter of 2023. Notably, there has been a 10% increase in comparison to the first quarter. Moreover, the month of July 2023 has witnessed a remarkable 77% surge in comparison to the total flows recorded in June 2023, which amounted to 23,359 individuals.
