New asylum applications vs. decisions during the year

Despite the deacceleration in the increase of population, since the border closure measures declared by national authorities, the intensification of socio-economic crisis has increased the population in need of humanitarian support, both population arriving and persons who were already residing in the country that have experienced an escalation in their basic needs.

During 2020, UNHCR and its partner agencies assisted some 16,923 persons of concern in Argentina, in the areas of subsistence, documentation, language, legal and social counselling, among others. Compared to 2019, the population reached with assistance increased by 262%.
